BellSouth Telecommunications, Inc. South Carolina Public Service Commission Docket No. 2001-65-C Interrogatories of the Consumer Advocate-Set No.1 April 11, 2001 Item 1-3 REVISED

REQUEST:

Please provide a comparison between the depreciation rates used in the models with the Company's last PSC approved depreciation rates. Also, please provide an additional column to Exhibit GDC-1 that presents the currently approved lives. If the answer to this rate comparison request is Exhibit GDC-2 Statement A and B, please so state.

RESPONSE: With the implementation of Price Regulation, BellSouth was given authority to establish its own depreciation rates in South Carolina. Thus, the Public Service Commission of South Carolina no longer approves depreciation rates or lives for intrastate booking purposes. The South Carolina Commission last approved depreciation rates for BellSouth for booking intrastate depreciation expense in 1992. These 1992 depreciation rates were developed using the remaining life approach, in which the embedded net book investment is spread over the average remaining life of the account.

> Depreciation rates in the forward-looking models are not based on the embedded investment. A comparison of depreciation rates in the model with 1992 prescribed depreciation rates would not be appropriate. However, in order to be responsive, BellSouth is providing depreciation rates booked for intrastate purposes in South Carolina. The depreciation rates in column H of Statement A in Exhibit GDC-2 (Bates page 00015) are those booked during the year 2000 for intrastate purposes in South Carolina during 2000. Attached are rates booked from 1992 through 1999.
